Der Wunsch, in einem Hause allein oder doch mit möglichst wenigen Miethsparteien zusammen zu wohnen, macht sich in den wohlhabenderen Familien Deutschlands immer lebhafter geltend. In norddeutschen Küstenstädten, namentlich in Bremen, sind auch bereits ganze Stadtviertel entstanden, welche diesem Wunsche entgegenkommen und in ihren Villenanlagen ländliche Abgeschlossenheit mit städtischem Comfort verbinden. Meist nach dem Muster der englischen „Cottages“ gebaut, tragen diese für eine, zwei, höchstens drei Familien berechneten Landhäuser einen etwas einförmigen Charakter, was sich zum Theil daraus erklärt, dass die Fachliteratur bisher kein Werk besass, aus welchem der Architekt Ideen und Anregungen schöpfen konnte.

Diesem oft beklagten Mangel soll nun durch vorliegendes Werk abgeholfen werden, welches dem Architekten, dem Maurermeister und dem Bauherrn eine Fülle von Mustern zur Nachbildung und Auswahl bietet. Die hervorragendsten Architekten Deutschlands und Oesterreichs haben sich vereinigt, um aus ihren praktischen Erfahrungen Vorbilder zu liefern, die sich durch Gefälligkeit in der äusseren Erscheinung, Einfachheit in der Gestaltung des Grundrisses und Wohlfeilheit in der Bauausführung gleichermaassen auszeichnen. Nur solche Entwürfe sind in diese Sammlung aufgenommen worden, die entweder schon ausgeführt, oder doch für die Ausführung bestimmt sind. Bei der Auswahl derselben ist besonders der Gesichtspunkt maassgebend gewesen, die Herstellung ländlicher Wohnhäuser für mittlere bürgerliche Verhältnisse zu erleichtern. Der Preis der Bauausführung bewegt sich von 5000 Mark an aufwärts.

Nach den beigegebenen Grundrissen und Details lassen sich die Bauzeichnungen mit leichter Mühe anfertigen. Die Pläne für Park- und Gartenanlagen werden den Bauherren sowohl wie den ausführenden Architekten eine angenehme Zugabe sein.
