H-WALL is a new system for dividing the classes of the modernity.

No more segregation of the internal islands in cities and in the country!

No more urban sprawl devastating the country!

No more contiguity with the inferior classes!

H-WALL finally allows the horizontal division of the society. Based on the latest and the most advanced theories by AFF, the new society is arranged with foresight and broadminded.

The theory of the *cremschnitte*, thanks to certain *engineering* developed by AFF and its team, is to be applied now on the global scale: H-WALL is now available for governments and religious leader in the whole wild world.

Ask the preventive AFF, it will guide and support you.
